CHATHAM BOROUGH
EMERGENCY GUIDE

Sign up for
ALERTCHATHAMBOROUGH
www.chathamborough.org
All of us know the importance of being prepared for an emergency. We have heard, over and over again, that we should maintain a supply of food, water, batteries and candles. But many of us have not taken the time to make sure that we are prepared for an emergency.

The purpose of this Emergency Guide is to help you prepare for an emergency before the emergency occurs, and to provide you with information that will help you during the emergency and in the recovery. In some situations, you will need to be prepared to take shelter in your home; in others, you will need to be prepared to evacuate and take shelter elsewhere. This guide provides the basic information you will need to be prepared in either situation.

This guide also provides the information you need to prepare for two different kinds of emergencies: (1) an emergency for which there is advance warning, such as a hurricane or snow storm, and (2) an emergency for which there is no advance warning, such as an earthquake or terrorist attack. For both types of emergencies, being prepared is the best defense.

We urge you to take the time to read this guide carefully with your family and begin making preparations. In fact, getting prepared for an emergency can be a family project. You should use this guide as a start; we have also listed additional resources for emergency preparedness.

Sign up for our emergency alert system—ALERTCHATHAMBOROUGH. You can choose the kinds of information you want to be notified about and how you want to receive messages—landline, cell phone, text, e-mail or TTY/TDD. You can sign up through the Borough web site—www.chathamborough.org—or call 973-635-0674 ext. 200 for assistance in signing up.

Emergencies do happen—don’t be caught unprepared!

Bruce A. Harris
Mayor

August 2013

Call 911 in the event of a serious, life-threatening emergency.
FOUR
IMPORTANT STEPS TO FOLLOW IF THERE IS AN EMERGENCY:

1. TURN ON YOUR RADIO OR TELEVISION
   Listen to an Emergency Broadcast Station for information about your area.
   - WMTR-AM 1250
   - WDHA-FM 105.5
   - MADISON: AM 1630
   Cable television subscribers tune to Cablevision: Channel 21 or FiOS: Channel 32

2. WATCH FOR MESSAGES FROM ALERTCHATHAMBOROUGH

3. CHECK WEBSITE
   www.chathamborough.org

4. FOLLOW INSTRUCTIONS OF EMERGENCY OFFICIALS
   You May Be Asked to Take Shelter at Home
   -OR-
   You May Be Asked to Evacuate
   (See Page 14)
   (See Pages 6, 12–13 & 15)
PREPARE YOUR HOME

• Food and water
• Supplies and tools
• First aid and sanitation (Hand Sanitizer)
• Communications — radio
• House number — Borough ordinance 188-1 requires all dwelling houses and stores which front upon any street to be properly numbered.

PREPARE TO EVACUATE

• Pack a “Go Bag.”
  Food and water
  Supplies and tools
  First aid kit and hand sanitizers
  Medication
  Communications — radio

• Know the evacuation routes.
  (See map on pages 12–13.)

• Decide on a meeting point.

OTHER PREPARATIONS

• Check insurance coverage.
• Make a list of all valuables and store in a secure place (weather resistant container).
• Check the trees on your property for dead limbs and hanging branches and have them pruned.
• Learn first aid and CPR (cardiopulmonary resuscitation).

WHEN YOU CHANGE YOUR CLOCKS, ALSO

• Replace smoke detector batteries.
• Update your emergency supplies.

Visit www.fema.gov for additional advance planning advice.
FOOD AND WATER
• Food for at least 3 days (dry or canned)
  Soups and vegetables
  Cereals and grains
  Powdered milk
  Be sure to have items that don’t have to be heated up.
• Water for at least 3 days: 1 gallon per person per day plus water for food preparation
• Non-electric can opener
• Medications for 3 days
• Baby food
• Utensils
• Pet food

SUPPLIES AND TOOLS
• Battery-, solar- or crank-powered radio
• Battery-, solar- or crank-powered emergency lights
• Candles, oil lamps and matches
• Fire extinguisher
• Shovel, wrench, screwdriver, hammer
• Materials to secure home (boards to cover windows, plastic sheeting to seal the interior, tape, rope, nails)
• Blankets and sleeping bags
• Wood (for a fireplace or stove), fuel, oil

FIRST AID AND SANITATION
• First aid handbook
• Bandages
• Aspirin
• Disinfectants
• Pail with cover (for emergency toilet)
• Toilet paper
• Towels and rags
• Baby supplies

Replace your food supplies every 6 months; donate unexpired food to a food pantry.

Visit www.fema.gov for additional preparedness advice.
PACK YOUR EMERGENCY KIT/“GO BAG” AND KEEP IT IN A CONVENIENT PLACE SO YOU CAN “GRAB IT AND GO”:

- Food and water for at least 3 days
- A change of clothing (dress in layers); footwear
- Bedding—two blankets per person or sleeping bags
- Medicines
- Baby supplies
- Cash
- Identification
- Maps, compass

KNOW YOUR EVACUATION ROUTES.

(See map on pages 12–13.)

HAVE A DESIGNATED MEETING PLACE FOR FAMILY MEMBERS.

Visit www.fema.gov for additional information.
BEFORE A HURRICANE

• Build an emergency kit and make a family communications plan.
  (See checklists on pages 5, 6 and 21.)

• Listen to NOAA Weather Radio or to commercial radio or television newscasts for
  the latest information. In any emergency, always listen to the instructions given by
  local emergency management officials.

• Know your surroundings.

• Learn community hurricane evacuation routes and how to find higher ground. Determine
  where you would go and how you would get there if you needed to evacuate.

• Make plans to secure your property.

• Cover all of your home’s windows. Permanent storm shutters offer the best
  protection for windows. A second option is to board up windows with \( \frac{5}{8} \)" marine
  plywood, cut to fit and ready to install. Tape does not prevent windows from
  breaking.

• Install straps or additional clips to securely fasten your roof to the frame structure.
  This will reduce roof damage.

• Be sure trees and shrubs around your home are well trimmed so they are more
  wind resistant.

• Clear loose and clogged rain gutters and downspouts.

• Reinforce your garage doors; if wind enters a garage it can cause dangerous and
  expensive structural damage.

• Plan to bring in all outdoor furniture, decorations, garbage cans and anything else
  that is not tied down.

• Determine how and where to secure your boat.

• Consider installing a generator.

• Consider building a safe room.

• Fill bathtubs with potable water.
BEFORE A THUNDERSTORM AND LIGHTNING

- Build an emergency kit and make a family communications plan. (See checklists on pages 5, 6 and 21.)
- Remove dead or rotting trees and branches that could fall and cause injury or damage during a severe thunderstorm.
- Postpone outdoor activities.
- Remember the 30/30 Lightning Safety Rule: Go indoors if you cannot count to 30 from the time you see lightning and hear thunder. Stay indoors for 30 minutes after hearing the last clap of thunder.
- Secure outdoor objects that could blow away or cause damage.
- Get inside a home, building or hard top automobile (not a convertible). Although you may be injured if lightning strikes your car, you are much safer inside a vehicle than outside.
- Remember, rubber-soled shoes and rubber tires provide NO protection from lightning. However, the steel frame of a hard-topped vehicle provides increased protection if you are not touching metal.

BEFORE A TORNADO

- Build an emergency kit and make a family communications plan. (See checklists on pages 5, 6 and 21.)
- Listen to NOAA Weather Radio or to commercial radio or television newscasts for the latest information. In any emergency, always listen to the instructions given by local emergency management officials.
- Be alert to changing weather conditions.
- Look for the following danger signs:
  - Dark, often greenish sky
  - Large hail
  - A large, dark, low-lying cloud (particularly if rotating)
  - Loud roar, similar to a freight train
- If you see an approaching storm or any of the danger signs, be prepared to take shelter immediately.
BEFORE EXTREME HEAT

• Build an emergency kit and make a family communications plan. (See checklists on pages 5, 6 and 21.)
• Install window air conditioners snugly; insulate if necessary.
• Check air-conditioning ducts for proper insulation.
• Install temporary window reflectors (for use between windows and drapes), such as aluminum foil-covered cardboard, to reflect heat back outside.
• Weather-strip doors and sills to keep cool air in.
• Cover windows that receive morning or afternoon sun with drapes, shades, awnings or louvers. (Outdoor awnings or louvers can reduce the heat that enters a home by up to 80 percent.)
• Keep storm windows up all year.
• Listen to local weather forecasts and stay aware of upcoming temperature changes.
• Know those in your neighborhood who are elderly, young, sick or overweight. They are more likely to become victims of excessive heat and may need help.
• Be aware that people living in urban areas may be at greater risk from the effects of a prolonged heat wave than are people living in rural areas.
• Get trained in first aid to learn how to treat heat-related emergencies.

BEFORE WINTER STORMS AND EXTREME COLD

• Before winter approaches, add the following supplies to your emergency kit:
  • Rock salt or more environmentally safe products to melt ice on walkways (Visit http://bit.ly/de-icers for a complete list of recommended products.)
  • Sand to improve traction
  • Snow shovels and other snow removal equipment
  • Sufficient heating fuel (You may become isolated in your home and regular fuel sources may be cut off. Store a good supply of dry, seasoned wood for your fireplace or wood-burning stove.)
  • Adequate clothing and blankets to keep you warm
  • Consider installing a generator.
BEFORE AN EARTHQUAKE

INDIVIDUAL, SINGLE-FAMILY HOME AND COMMUNITY
EARTHQUAKE PLANNING TIPS

If a major earthquake struck in your area today, you might be without direct assistance for an extended period.

Preparedness

• Build an emergency kit and make a family communications plan. (See checklists on pages 5, 6 and 21.)
• Know the safe spots in each room—under sturdy tables, desks or against inside walls.
• Know the danger spots—windows, mirrors, hanging objects, fireplaces, tall furniture.
• Conduct practice drills. Physically place yourself and your children in safe locations.
• Decide where your family will reunite if separated.
• Keep a list of emergency phone numbers.
• Choose an out-of-state friend or relative whom family members can call after the quake to report whereabouts and conditions.
• Learn how to shut off gas, water and electricity in case the lines are damaged.
• Check chimneys, roofs and wall foundations for stability. Call a licensed contractor if there are any questions.
• Secure water heaters and appliances that could move enough to rupture utility lines.
• Keep breakable and heavy objects on lower shelves.
• Secure hanging plants and heavy picture frames or mirrors (especially those hanging over beds).
• Put latches on cabinet doors to keep them closed during shaking.
• Keep flammable or hazardous liquids such as paints, pest sprays or cleaning products in cabinets or secured on lower shelves.

During an earthquake, stay away from heavy furniture, appliances, large panes of glass, shelves holding heavy objects and masonry veneer (such as the fireplace). These items tend to fall or break and can injure you. Usually, a hallway is one of the safest places if it is not crowded with objects. Kitchens and garages tend to be most dangerous. Also know the safest place in each room. It will be difficult to move from one place to another during a severe earthquake.

Always know the possible ways to exit your house and workplace in emergency situations.
Portable Generators Pose A Serious Carbon Monoxide Hazard

⚠️ DANGER ⚠️

Using a generator indoors CAN KILL YOU IN MINUTES.
Generator exhaust contains carbon monoxide. This is a poison you cannot see or smell.

UNLESS:

- **NEVER** use inside a home or garage, EVEN IF doors and windows are open.
- **Only use OUTSIDE** and far away from windows, doors, and vents.

6. ST. PATRICK CHURCH
7. STANLEY CONGREGATIONAL CHURCH
8. BOROUGH HALL — 54 FAIRMOUNT AVE
IF YOU ARE ASKED TO TAKE SHELTER IN YOUR HOME

In the event of a radiological, chemical or biological emergency, authorities may direct you to evacuate or remain in your home.

- Go inside and stay there.
- Close all outside doors and windows.
- Keep pets inside.
- Turn off air intakes such as fans and air conditioners.
- Do not use your telephone (landline or cell) except for personal emergencies.
- If you are not at home, go to one of the nearest available shelters.
  (See page 16 for Warming Centers Listing.)

KEEP LISTENING TO YOUR RADIO OR TV FOR THE LATEST INFORMATION AND INSTRUCTIONS.
• Lock doors and windows.

• Secure your pets in a safe place with food and water if they are not coming with you.

• Post a message that tells where you are going and who is with you.

• Grab your supplies and your “Go Bags.”

• Leave—use recommended evacuation routes. Do not drive through flood waters.

• Listen to your radio.

• If you need transportation, call the Chatham Borough Emergency Management Operating Center, 973-417-3042.

Reminder: Shelters do not allow alcohol, smoking, firearms or pets!
Check to find out which Warming Centers/Charging Sites are open:

Before an Emergency Strikes

☐ Minimum 3 days of stored water and food
☐ Non-electric can openers
☐ Flashlights and batteries
☐ Battery-powered radio
☐ Cell phones fully charged, with spare batteries
☐ Fill fuel tanks in all your vehicles.
☐ Gasoline and extension cords for your generator (if you have one)
☐ Minimum 3 day supply of any prescription medications
☐ Topical first aid supplies: antiseptics, bandages, etc.
☐ Personal hygiene items, including toilet paper
☐ Emergency multi-purpose knife
☐ Matches, lighters and fire starting devices
☐ Copies of your important paperwork and identification documents
☐ “Go Bag”: Do you have a bag ready in case you have to evacuate?
☐ Pet preparedness: Do you have enough food and water for your animals?
☐ In winter, a warm hat and gloves to protect you from the elements
☐ Local map and compass
☐ Water carrying containers (and a way to carry them)
☐ Wrenches and pliers for turning off utilities and shutting water pipes
☐ Battery-powered smoke and CO alarms
☐ Snow shovels
☐ Rock salt, calcium chloride and sand for melting snow
☐ Jumper cables
☐ Prior to storm have landscaper or tree company look at all your trees for dead limbs or hanging branches and prune where needed.
☐ Secure all outdoor items, such as patio furniture and umbrellas.
☐ Fill bathtubs with potable water.
